DECLARATION

I hereby declare that the entire work embodied in this dissertation has been carried out by me and no part of it has been submitted for any degree or diploma of any university previously.

Place: Mangaluru

Date: 31 July 2025

Name: Pawan Kumar

USN: 4SO23MC068

ABSTRACT

The Vehicle Assistance Network is a web-based application developed to streamline vehicle service center operations by eliminating manual processes. It allows customers to request services online, track status updates, and receive timely notifications, reducing the need for physical visits. Admins can manage users, assign services, and generate reports, while employees handle job cards and service updates digitally.

Developed using React JS, Material-UI, Node.js, and MySQL, the system supports responsive UI, real-time data handling, and secure access for admins, employees, and customers. Key modules include service request management, job card handling, billing, and feedback collection.

This project was completed during an internship at Accolade Tech Solutions, offering hands-on experience in frontend development, API integration, and database connectivity. The application enhances service efficiency, improves communication, and provides a centralized platform for better user experience and operational control.

ACKNOWLEDGEMENT

I express my heartfelt gratitude to St Joseph Engineering College, Mangaluru, and the Department of Computer Applications for providing me with the opportunity to undertake this internship as part of the MCA curriculum. I am deeply thankful to Rev. Fr Wilfred Prakash D'Souza, Director, SJEC, Fr Kenneth Rayner Crasta, Assistant Director, SJEC and Dr. Rio D'Souza, Principal of St Joseph Engineering College, for his constant support and for fostering an environment that encourages academic and professional growth. My sincere thanks to Dr. Hareesh B, Head of the Department, for his continuous encouragement and support throughout my academic journey. I would also like to thank my internal guide, Ms. Sumangala N, Assistant Professor, for her valuable guidance, timely feedback, and constant motivation, which helped me complete this internship successfully.

I am grateful to Accolade Tech Solutions Pvt. Ltd., Mangaluru, for providing a dynamic and learning-rich environment. I am especially thankful to my external mentors, Mr. Harish Kumar and Mr. Mohammed Ashik, for their insightful technical guidance and mentorship throughout the project development phase.

I extend my deepest gratitude to my beloved parents, whose unwavering love, sacrifices and constant encouragement have been the foundation of my journey. Their support—both emotional and moral—has been my greatest strength throughout the course of this project and my academic life. I also wish to express my heartfelt thanks to my dear friends for their valuable suggestions, timely help and encouragement during various stages of the project.

Above all, I bow in reverence to God Almighty, whose infinite grace, guidance and blessings illuminated my path and gave me the strength and clarity to complete this project successfully. Without His divine presence and mercy, this work would not have been possible.

Pawan Kumar
